Answer: The Fund has a two-tiered network, medical and hospitalization. (See, question #2 explaining hospital coverage.) If your doctor or specialist is in the MagnaCare PPO network, they will be treated as in-network physicians. The Plan **does not** cover doctors or specialists who are not in the MagnaCare PPO network.

The Plan never covered out of network doctors or specialists. This was applicable when the Plan previously retained the Anthem Blue Cross/Blue Shield network as well.

4. Should I use the MagnaCare network for my future provider for doctors and hospitalization?

Answer: Yes and No. The MagnaCare network is a Physician Access Network only. You will receive coverage through the access network for major medical benefits that are **outside** the hospital setting. This includes diagnostic services (including laboratory services, x-rays, etc.) that are not administered in the hospital setting.

Your hospital network is an open network. Therefore, the cost associated with the services provided to you will be reviewed and negotiated on behalf of the Fund through the Fund’s Third Party Administrator. You should contact MedWatch (see, paragraph 2), for pre-certification.
